DO NOT reuse passwords

If a foe discovers your password to one account, they'll try it on other accounts.

AND variations of it

DO NOT use terrible passwords

most common passwords:
password
123456
123456789
guest
qwerty
12345678
111111
12345
from nordpass.com

Long lists of known passwords from hacked databases are fed into every password-breaking tool.

DO use long passwords

Time to crack a password in 2024		
# of ... numbers ... letters		
4	INSTANTLY	
6	minutes	
8	seconds	hours
10	hours	months
12	days	years

from hivesystems.io

DO use a password manager

+1 for the built-in password manager in your browser

to create and store strong passwords for you

long & random

DO use passphrases

To protect your password manager and unlock devices. Random words make an easy-to-remember phrase:

correct horse battery staple

Make these on dicepass.org

DO use two-factor authentication

via text or token or app

haveibeenpwned.com
to see if your logins or passwords are compromised
