

## GAZA IN AUGUST 2025

Israel has killed over 62,000 people in Gaza since 2023, using \$30 billion in weapons from the United States.

Israel has blocked humanitarian aid and border crossings, forcing Gazans to seek food from only a few convoys where they are often shot trying to obtain food.

Gaza is in IPC Stage 5 hunger, the final catastrophic phase: starving to death.

Trump has blocked all Gazans from coming to the US, including emergency medical evacuees.

@dahlia.lina

*your nation rests on a grave of milk teeth and ash*

if this is survival  
why do we disappear  
one child  
at a time

if you are the chosen  
why do your fangs drip  
with infant blood

if god gave you this land  
why must you dig graves to claim it

if this is your homeland  
why do the ghosts not speak your  
name

You cannot cage a people  
made of fire and the sky.

I wonder what it feels like  
to be you  
indifferent to human suffering  
walking over the ashes of  
dreamers  
and infants' bones  
as if they were nothing  
but dust on your shoes

I pity you  
for thinking your life meant something  
when all you did  
was exist  
on stolen breath
